

## ICT Excel Skills Broadband Deals

Vets now want to get broadband for their business. They need to know which deal will be best for them and have asked you to set up a spreadsheet to show them the different options which clearly identifies the best option for them.

They have done some research online and found some options which may be ok for them:

	Business Broadband Essentials 38	Business Broadband Essentials 76	B
<b>Monthly Price (exc.VAT)</b> new customer	£18.75	£22.50	
<b>Monthly Price (exc.VAT)</b> existing customer	£16.67	£20.00	
<b>Contract length</b>	18 months		
<b>Speed</b>	Up to 38Mbps	Up to 76Mbps	
<b>Usage</b>	Unlir		
<b>Calls minutes</b>	Standard call rates		
<b>Support</b>	Standard support		
<b>Single Static IP</b>	✓	✓	
<b>Smart divert</b>	—	—	
<b>4GB Mi-Fi Device</b>	—	—

Guest Wi-Fi

They have asked you to set up a spreadsheet to clearly show the following information:

- Monthly price
- Contract length
- Line Rental per month
- Speed (download)
- Speed (upload)

They then want help working out the best deal and the spreadsheet to show:

- The total cost of each deal
- The average cost each month over the life of the contract
- The average cost of all the deals
- Whether each deal's total cost is above or below the average cost
- The average download and upload speed
- Whether each deal's download and upload speed is above or below the average download and upload speed
- Which you consider to be the best offer

They finally want you to see if there are any better offers for business broadband available. Research online other companies and add them into your spreadsheet.
